

Dear Friends,

By 2010 24 million Africans will have died of AIDS. Most die young, leaving children without parents and families without income. People are dying in tragic circumstances and African society is being destroyed.

For 28 years, I've been practicing and teaching homoeopathy. I have treated many AIDS patients in the UK, US and Tanzania and I know that homoeopathy can be of tremendous help in this disease. I am passionate about using it to treat those suffering from AIDS in Africa.

Now, with your help, we can bring the benefits of homoeopathy to African AIDS patients. I will be working with a Tanzanian homoeopath, Sigsbert Rwegasira, to open a homoeopathy centre dedicated to treating AIDS patients and teaching homoeopathic treatment of AIDS to local health providers.

We need your donations to fund the Homoeopathy AIDS Treatment and Teaching Centre.

Together we can bring relief from suffering and the hope of health through homoeopathy.

Homoeopathy for AIDS in Africa

New hope for a
devastating disease

**Help us fund an
AIDS treatment and
teaching centre**

HELP US – HELP THEM

AIDS is devastating Africa

Nineteen million Africans have died of AIDS. Eleven million children are orphans. African families and societies are being destroyed. Parents are too sick to care for their children. Orphans are taking care of siblings, many forced to beg for food on the streets. Social and health structures are failing, leaving widespread poverty and malnutrition.

Why homoeopathy for AIDS in Tanzania?

- Preliminary case studies show substantial evidence of homoeopathy helping AIDS patients
- Homoeopathy is effective and low cost
- Homoeopathy is natural and health enhancing
- Homoeopathy is an official form of medicine in Tanzania

**We have the expertise to make a difference.
Please help us with funding.**

What will your donation provide?

- A homoeopathy treatment and teaching centre dedicated to patients suffering from AIDS
- Expert homoeopathic treatment for hundreds of AIDS patients
- Homoeopathic education in AIDS treatment for African health providers and students of the Tanzanian School of Homoeopathy
- Clinical data evaluation for assessing and refining treatment and teaching homoeopaths worldwide.

- **Jeremy Sherr** is a world-renowned practitioner and teacher of homoeopathy. He is the founder of an international postgraduate school of homoeopathic medicine and lectures throughout the world. Jeremy has conducted extensive research in homoeopathy, and has published several books. Born in Africa, Jeremy is dedicated to spreading the benefits of homoeopathy to this continent and making a contribution to a global AIDS solution.

- **Sigsbert Rwegasira** is the founder and director of The Natural Therapies Centre, which sees 10,000 patients annually. He serves as a consultant for the Tanzanian Ministry of Health and is opening the Tanzania School of Homoeopathy and Traditional Medicine at Muhimbili University. Sigsbert led a successful campaign to make homoeopathy a legally recognized system of medicine in Tanzania.

TO DONATE

Please make cheques payable to
Homoeopathic Action Trust and send to:
